It looks as though we are finally catching up with our newsletter. My Press will be running tonite (May 3, 1978) and I hope to mail tomorrow! Thanks again for all the patience you have shown.

Next week I will be in Boston and I hope to see several opisthobranch people while there and attend Terry Gosliner's graduation. I will be back about the 15th of May and go into the hospital for minor surgery on the 17th. I should be home for about three weeks after that.

OPISTHOBRANCH NEWSLETTER

VOLUME X, NUMBERS 6-7)

PAGE 13.

JUNE-JULY, 1978.

Illustration at right:

Chromodoris luteorosea
drawn by Malcolm Edmunds

The OPISTHOBRANCH NEWSLETTER is published monthly by Steven J. Long. Subscriptions are \$10.00 per year for individuals and \$12.50 per year for institutions. Subscriptions are by calendar year. Back volumes are available at \$5.00 per volume. Send subscriptions to Steven J. Long c/o Applied Microfilm Systems, 2175 De La Cruz Blvd., Santa Clara, California 95050, U.S.A.

I am on the move again! I am changing jobs for the first time in over eleven years. I will be working near Stanford University so I should be able to get into a good library for the first time since I started the ON. The family and I will not actually move until 8 July but I will use this address for the ON and try to save one change. I will be renting a house for the first few months and then buying. Please send all mail to the address listed on the masthead. I am doing a double issue of the ON before I tear down the printing press and plate-maker for the trip to Santa Clara. I hope to get the works running again in time for an early August issue. If I don't, I will get it printed commercially again.

Thanks to Gary McDonald, Dr. Baba, Dr. Ros, Dr. Edmunds, and others who have recently sent information for the ON.

Jim Lance sent a card from Acapulco, Mexico, where the cruise he is on touched port in early June. Most of the opisthobranchs are being taken by SCUBA or snorkel but collections have been made at every anchorage. Jim should be about home by the end of June.

Eveline Marcus wrote (25 May) that she was in Boston area. I left there on 15 May. Alan Kuzirian, Terry Gosliner, and Eveline collected near Nahant, Massachusetts and Eveline also visited M. Patricia Morse. Eveline will be going to Canada soon and then on to Europe.

The Western Society of Malacologists' meetings will be held 28 June to 1 July, 1978, at the University of Santa Clara, which is less than a mile from where I will be living after 8 July. I hope to at least drop in on the meetings although I will still be working here.

My trip to Boston was really nice. I spent my first day there with Alan Kuzirian and Terry Gosliner. We went to the Museum of Comparative Zoology at Harvard and Met Ken Boss, Ruth Turner, and Henry Russell. I also talked with Roy Hughes while I was there. That afternoon we went up to see M.P. Morse and had dinner after touring the Northeastern University marine laboratories. During the week I managed to get in one boat trip around Boston Harbour and a look at George's Isla d Friday, I went up to Durham, New Hampshire, and stayed with Annmarie and Larry Harris for the weekend. Saturday, Alan and Terry took me

out in Salem Harbor collecting and Sunday, I watched Terry receive his PhD. during commencement ceremonies at the University of New Hampshire. Larry and Annmarie put me on the plane in Boston, Monday, and prepared to leave for Florida the same Friday (19 May). They should be at the Fort Pierce Bureau of the Smithsonian Institution until about 19 June and then home.

David Behrens is working with the lamellarids of the western coast of North America. He will appreciate information, specimens on loan, or photos on loan. He has grouped our coastal specimens into three genera and six species. Dave will also appreciate depth information on Cephalaspideans *Chelidonura inermis* and *Aglaja* spp.; *Dendronotus frondosus* and any new deepwater *Cadlina*'s. A colleague of his has recently collected all in waters about 900' deep off Pt. Blancas. Their finds will be reported soon, hopefully in THE VELIGER. Contact David Behrens, 416 Lilac Drive, Los Osos, CA 93402.

Dr. M.P. Morse and Jim Lance were at Belize, C.A., during April of this year. A few nudibranchs were collected.

Gordon Robilliard is still working with opisthobranchs although his research time is being crowded with consulting work.

Bill Rudman starts as a molluscan curator at The Australian Museum in about July of this year.

From Ian Loch: "The local scene has been reasonably active. We did a dredging trip in H.M.S.A. 'Kimbla' in December, off the Queensland coast. Mainly cephalaspidean shells in the sediment. The N.S.W. State Fisheries boat 'Kapala' has brought in some lots of *Umbraculum* from 200-300 m. Local divers continue to produce new species, including a *Chromodoris* which is apparently mimicing *Casella atromarginata*. In March we collected at Kangaroo Is. off the coast of South Australia with our fish department. Quite a rich haul of opisthobranchs, but the samples still being sorted. Interestingly enough, the poison stations of the fish people also affected opisthobranchs after a while, so they drifted out of hiding. And no great white bites seen during the diving."

Hans Bertsch will be taking over as curator for molluscs at the San Diego Natural History Museum soon.

Dave Mulliner will be travelling to the Solomon Islands during the last week of June to do some collecting.

Sandra Crane Millen writes: "I am retyping my manuscript of the identification guide and trying to sort out the many unknowns in my collections. In particular the *Adalaria* - *Onchidoris* group and the *Doto*'s are troublesome. Thompson has been helping me with the former. I also have a partly completed description of a large white dorid with brown blotches which appears to be an *Anisodoris* with penal spines. At least they are not all unknown - I have finally found *Hermaea vancouverensis* and what appears to be *Doris odonoghuei*. If anyone wants to check out the reproductive system of the latter I would be glad to send my only specimen. The radula fits perfectly. Externally it looks very much like a little *Diadumene* and I suspect that has caused it to be overlooked at times."

The American Malacological Union 44th Annual Meeting will be held July 16-21, 1978, at the University of North Carolina, Wilmington, N.C.

JUNE-JULY 1978.

ALPHABETICAL INDEX TO OPISTHOBRANCH CITATION NUMBERS

I have a list of all citations printed in the ON and in Dr. Russell's Index Nudibranchia. There are numerous errors but still very useful information. I will try to print as much of the index as possible in this number.

OPISTHOBRANCH NEWSLETTER

JUNE-JULY 1978.

This index is sorted by author and chronologically within the author. All papers which have been numbered and cited in either Dr. Russell's INDEX NUDIBRANCHIA or my bibliography are included through May, 1978. The citation number is immediately prior to the author's name. Two columns are on each page. In some cases portions of the author's name have been omitted due to the length of the list. For the same reason, some of the publication dates have been left out. I will try to abbreviate to avoid this problem in future issues of this index. The cited numbers in Dr. Russell's work run from 1 to about 2500. My numbers start in at 5000 for the ON and run through 9859 for May. I have been attempting to complete the listing of older opisthobranch papers not included previously. When they have been listed I will try to revise the alphabetical index.

Thanks to all of you who have sent encouragement along with your subscriptions.

We are still collecting stamps for the kids in the family and all are appreciated. Duplicates are traded for other stamps. Thanks to those of you who take the extra time to enclose a few used stamps or even to paste a pretty stamp on the envelope.

OPISTHOBRANCH NEWSLETTER (72317) 1101

24 OCT 1978
PURCHASED BY
ZOOLOGY LIBRARY

VOLUME X,
NUMBERS 8-10,
PAGE 47.

AUGUST-OCTOBER 1978.

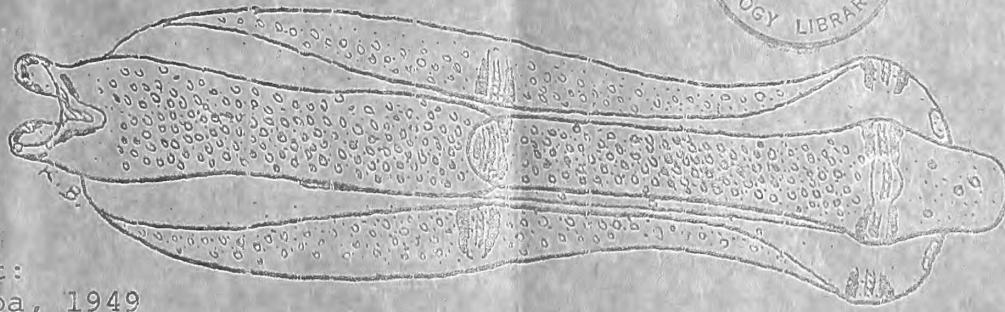

Illustration at right:
Aglaja orientalis Baba, 1949
Drawn by K. Baba.

The OPISTHOBRANCH NEWSLETTER is published by Steven J. Long, 792 Laurie Avenue, Santa Clara, California 95050, U.S.A. Subscriptions are \$10.00 per year for individuals and \$12.50 per year for institutions. Subscriptions are by calendar year. All back volumes are available at \$5.00 per volume. Send subscriptions and other requests to the editor.

I am sorry to be so late getting another issue out. The move did not go quite as well as we had hoped. One son fell off a cliff at Montana de Orro State Park and has recovered from near death. My job here fell through and I am just getting ready to go to work. It has been exciting!

The post office only forwards second class mail for three months and that time is almost up. I hope that everyone will mail to this new address as Applied Microfilm Systems is apparently returning some mail "Moved, Address Unknown".

We live between Highways 101 and 17 and about one mile north of their junction - right at the bottom of San Francisco Bay. To reach our home, take the Montague Expressway from either 17 or 101 and turn south on De la Cruz Blvd (at entrance to Agnews State Hospital); one block south on De la Cruz to Clyde; one block west to Laurie; three blocks south to our house. Our telephone number is (408) 988-3920. Stop by and see us if you are anywhere in the area.

The OPISTHOBRANCH NEWSLETTER will continue publication as long as there is interest from workers in the field. My personal opportunities for research and collecting are limited now but should increase as time goes on. The first priority is to make a living.

I would appreciate some additional drawings for the ON. I have a few left but don't want to run out. See past issues for sizes which I can use. Right now I don't have a way to reduce the drawings.

I will be happy to distribute reprints for any of you who want me to. Please send a distribution list or I will send to all individual subscribers on the latest address list.

I will be happy to print short notes and range extensions. I do not want to print new species descriptions. If the paper appears to require review it will be sent to one or more opistobranch people for review.

PERSONAL NOTES

From Dr. Kikutarō Baba: In May, Mr. Koji Kitao, a new friend of mine, and I, went collecting on a coral reef area of Ishigaki-jima Island of Ryukyu (Okinawa), and made observations on live specimens of the Ascoglossa (Julia, Tamanovalva, Volvatella, Oxynoe, Lobiger and Elysia), and the Nudibranchia (Chromodoris, Robostra, Nembrotha, Pyllidia, Pteraeolidia, etc.). Many of these served as subjects for color photography. [Continued next page]
